Professional Summary

AI & Data Science undergraduate (Cybersecurity Honours, SGPA 8.98/10) with hands-on expertise in Machine Learning, Applied NLP, Local RAG architectures, and AI Security. AI/ML Associate at DEVS (REC), selected among the top ~1.2% of 800+ applicants. Experienced in building production-grade ML pipelines, decoupled RAG platforms, and secure AI workspaces with prompt-injection defenses. Seeking a **Machine Learning** or **Cybersecurity Engineering Internship** to build resilient, intelligent systems.

Technical Skills

Languages: Python, Java, C, SQL, PL/SQL, HTML/CSS, JavaScript

AI / ML & NLP: Machine Learning, Deep Learning, Natural Language Processing, RAG, Scikit-learn, PyTorch, Librosa, NumPy, Pandas, Polars, LangChain, LangGraph, Ollama

Frameworks & Databases: FastAPI, Flask, Streamlit, ChromaDB, SQLite, PostgreSQL

Security, DevOps & Tools: Kali Linux, Wireshark, Ethical Hacking, Network Security, SIEM, Prompt Injection Defense, Vulnerability Assessment, Docker, MLOps, Git, Linux, Hack The Box

Leadership & Organizational Experience

DEVS (REC) – Official Technical Club of REC

Aug 2026 – Present

AI / ML Associate

Chennai, India

- Selected as **1 of only 10 AI/ML Associates out of 800+ applicants** (~1.2% selection rate) based on rigorous multi-stage coding benchmarks and machine learning technical assessments.
- Co-developed and shipped **HackMentor AI** with club leads, engineering AI guardrails and managing GitHub fork/PR workflows; spearheading peer workshops on Scikit-learn and ML pipeline design.

Technical Projects

HackMentor AI – AI Hackathon Evaluation Workspace & Security Guardrails

DEVS REC Production Project

- Co-engineered an AI-powered hackathon evaluation and decision workspace deployed live for Rajalakshmi Engineering College accounts, streamlining scoring and judge assessment workflows.
- Implemented security-by-design guardrails mitigating **prompt injection** attacks, enforcing strict input sanitization and file limits to preserve scoring integrity; resolved critical pre-deployment runtime bugs during live event prep.
- Collaborated in an agile cross-functional team with Fullstack, DevOps, and Design leads, navigating GitHub fork/PR reviews, code audits, and live event walkthroughs.

DocMind – Decoupled Document AI & Local RAG Platform

GitHub

- Engineered a decoupled Document AI and RAG platform using Docling layout parsing, ChromaDB vector store, and SQLite persistence for enterprise-grade semantic querying.
- Implemented hybrid dual-engine routing supporting local LLMs (Ollama) and cloud APIs (NVIDIA NIM, OpenAI) achieving zero data leakage on sensitive enterprise documents with configurable backends.

MailShield-AI – Offline Email Triage & Privacy-First RAG

GitHub

- Built a 100% local, offline email triage system using a dual-model LLM ensemble (Phi-3 + Mistral via Ollama) integrated with custom RAG pipelines, IMAP protocol handling, and automated inbox classification workflows.
- Architected model-voting consensus and explainability logic (Inbox Explorer) ensuring automated classifications are transparent, auditable, and traceable to user feedback.

Risonanza – Real-Time Voice Emotion & Stress Classifier

Live Demo

- Developed a real-time acoustic emotion classifier during a 24-hour hackathon sprint, achieving ~85% accuracy with Librosa MFCC/Chroma feature extraction and Scikit-learn modeling.
- Deployed an interactive Streamlit web demo under strict deadline constraints for live speech signal processing, waveform visualization, and real-time inference.

ML Projects Portfolio – First-Principles Machine Learning

GitHub

- Implemented SVM classifiers and linear regression from scratch without high-level ML libraries; resolved pipeline data leakage bugs and iterated a Sonar classifier to ~90.5% accuracy across 8 versions.

Education

Rajalakshmi Engineering College, Chennai

Jul 2025 – Jul 2029

B.Tech in Artificial Intelligence & Data Science (Cybersecurity Honours Track) – SGPA: 8.98/10

Velammal New Gen, Surapet

Jun 2023 – May 2025

CBSE Class 12 (Computer Science & Mathematics) – 472/500 (94.4% | 100% in Computer Science)

Certifications

Google Cybersecurity Professional Certificate (Coursera) | Ethical Hacking with Kali Linux (IBM) | Introduction to Artificial Intelligence (LinkedIn Learning)
