Professional Summary

AI & Data Science undergraduate (Cybersecurity Honours, SGPA 8.98/10) with hands-on expertise in Machine Learning, Applied NLP, Local RAG architectures, and AI Security. Experienced in architecting production-grade ML pipelines, decoupled RAG platforms, and secure AI workspaces with prompt-injection defense mechanisms. Proven ability to optimize inference latency, preserve 100% data privacy, and deliver robust software. Seeking a **Machine Learning** or **Cybersecurity Engineering Internship**.

Technical Skills

Languages: Python, Java, TypeScript, JavaScript, C, SQL, PL/SQL, HTML/CSS

AI / ML & NLP: Machine Learning, Deep Learning, Natural Language Processing, RAG, Scikit-learn, PyTorch, Librosa, NumPy, Pandas, Polars, LangChain, LangGraph, Ollama

Frameworks & Databases: Next.js, React, FastAPI, Flask, Streamlit, Tailwind CSS, ChromaDB, PostgreSQL, SQLite

Security, DevOps & Tools: Metasploit, Kali Linux, Wireshark, Ethical Hacking, Network Security, SIEM, Prompt Injection Defense, Docker, MLOps, Git, Linux, Hack The Box

Leadership & Technical Experience

DEVS (REC) – Official Technical Club of REC

Aug 2026 – Present

AI / ML Associate

Chennai, India

- Selected as AI/ML Associate through competitive multi-stage coding benchmarks and technical evaluations to contribute to core club software initiatives.
- Co-developed and shipped **HackMentor AI** and the **DEVs-P2P** learning platform (learn.devsrec.com), engineering security-by-design guardrails and managing PR workflows.

Technical Projects

HackMentor AI – AI Hackathon Evaluation Workspace & Security Guardrails

DEVS REC Production Project

- Accelerated hackathon scoring throughput by **~40%** across 15+ judging panels and college accounts by architecting an AI-assisted evaluation engine with structured schema extraction.
- Neutralized adversarial scoring manipulation with **0 security breaches** across 30+ simulated direct and indirect injection vectors via multi-stage input sanitization and system prompt anchoring.
- Collaborated in an agile cross-functional team with Fullstack and DevOps leads, managing GitHub fork/PR workflows, security audits, and live event deployments.

DocMind – Decoupled Document AI & Local RAG Platform

[GitHub](#)

- Eliminated data egress risks (**100% local privacy**) while sustaining sub-second retrieval latencies across complex multi-page PDFs using Docling layout parsing and ChromaDB vector indexing.
- Reduced cloud API inferencing costs by **~60%** by engineering an adaptive dual-engine router that dispatches routine tasks to local Ollama models and escalates multi-hop reasoning to NVIDIA NIM / OpenAI.

MailShield-AI – Email Threat Intelligence & Forensics Platform (SIH 2026)

[GitHub](#)

- Architected an 8-stage digital forensics pipeline for SIH 2026 delivering deterministic threat scoring (0–100), RFC 5322 header inspection, and sender IP geolocation for SOC analysts.
- Engineered an AI investigation copilot and graph correlation engine linking threat indicators, ensuring 100% local processing with zero sensitive data exfiltration.

Risonanza – Real-Time Voice Emotion & Stress Classifier

[Live Demo](#)

- Built and deployed an end-to-end acoustic emotion recognition app within 24 hours, achieving **~85% classification accuracy** with sub-300ms audio inference across 6 emotional states.
- Streamlined speech signal processing with Librosa MFCC and Chroma feature extraction, integrated with an optimized Scikit-learn classifier into an interactive Streamlit UI.

ML Projects Portfolio – First-Principles Machine Learning

[GitHub](#)

- Boosted classification accuracy from baseline to **~90.5%** across 8 iterative versions on the UCI Sonar dataset by engineering SVM classifiers from scratch and eliminating pipeline data leakage.
- Constructed reproducible Scikit-learn pipelines with StandardScaler isolation, StratifiedKFold cross-validation, and GridSearchCV hyperparameter tuning on healthcare datasets.

Education

Rajalakshmi Engineering College, Chennai

Jul 2025 – Jul 2029

B.Tech in Artificial Intelligence & Data Science (Cybersecurity Honours Track) – SGPA: 8.98/10

Velammal New Gen, Surapet

Jun 2023 – May 2025

CBSE Class 12 (Computer Science & Mathematics) – 472/500 (94.4% | 100% in Computer Science)

Certifications

Google Cybersecurity Professional Certificate (Coursera) | Ethical Hacking with Kali Linux (IBM) | Introduction to Artificial Intelligence (LinkedIn Learning)
